

REMARKS

By the present Preliminary Amendment, a minor revision has been made in the specification and the corresponding portion of claim 4 with claim 4 further being amended so that the terminology is more grammatically correct. Dependent claim 5 has been amended to relocate the period to the end of the claim. In addition, all multiple dependency has been eliminated from the claims and new claims 9-24 have been added to encompass certain aspects of the invention within the original claims. It is to be understood that the revisions to the claims are solely for formalistic purposes and not with regard to patentability and that applicants reserve the right to submit additional claims relating to other aspects of the invention within the original multiple dependent claims or supported by the specification.

Entry of the instant Preliminary Amendment and favorable consideration on the merits are respectfully requested.

Should the Examiner have any questions concerning the subject application, the Examiner is invited to contact the undersigned attorney at the number provided below.

Respectfully submitted,

BURNS, DOANE, SWECKER & MATHIS, L.L.P.
